Monarch Jain

+91 8770458648 | monarch123jain@gmail.com | linkedin.com/in/monarchjain | Portfolio | Pune, India

Professional Summary

Software Engineer with hands-on experience in **software development, backend development, API integration, testing, and debugging**. Skilled in **Python, Java, JavaScript, REST APIs, and databases**, with experience building web/mobile applications and integrating **AI/ML capabilities** using Python, OpenCV, and PyTorch.

Education

M.Tech (IT) **2026**
SGSITS, Indore

MCA **2024**
FCAIT–GLS University, Ahmedabad

BCA **2022**
St. Xavier's College, Ahmedabad

Technical Skills

Programming: Python, Java, JavaScript, Dart, Apex

Backend: Flask, Node.js, Express, REST APIs, JWT

Mobile / Frontend: Flutter, GetX, HTML, CSS

Databases: MySQL, MongoDB, SQL, SOQL, SOSL

AI/ML: PyTorch, OpenCV, Hugging Face, IndicBERT, Wav2Vec2, Whisper, VGG16

Tools: Git, GitHub, VS Code, Postman, Android Studio

Core: OOP, DSA, Algorithms, OS, Computer Networks

Experience

Umbrella Protection Systems **June 2025 – October 2025**
Python & AI/ML Intern *Indore, India*

- Developed an Employee Attendance Management System using **Python, Flask, MongoDB, OpenCV, and REST APIs**, implementing employee management, attendance tracking, validation, and reporting workflows.
- Integrated **computer vision and face recognition** for automated employee identification and real-time attendance processing, while implementing API validation, duplicate detection, database operations, testing, and debugging.

CodeMeg Soft Solution Pvt. Ltd. **February 2024 – April 2024**
Flutter Developer Intern *Indore, India*

- Developed cross-platform mobile applications using **Flutter and Dart**, implementing responsive interfaces, application logic, reusable UI components, and REST API integration.
- Handled **API responses, data validation, error handling, testing, debugging, maintenance, and performance improvements** to support reliable application workflows and deployment.

Projects

AeroBasket – Flight Booking Application — Flutter, Node.js, Express, MongoDB [GitHub] **2024**

- Developed a full-stack flight booking application using **Flutter, GetX, Node.js, Express, and MongoDB**, implementing flight search, user profiles, cart management, booking workflows, and database-backed application features.
- Implemented **JWT authentication** including registration, login, OTP-based password recovery and reset, and developed REST APIs for secure mobile-backend communication, validation, and data management.

Employee Attendance Management System — Python, Flask, MongoDB, OpenCV **2025**

- Built a backend-driven attendance platform with **Python, Flask, MongoDB, OpenCV, and REST APIs**, supporting employee data management, attendance tracking, validation, and reporting.
- Implemented **face recognition, duplicate detection, API validation, and database workflows** to automate employee identification and attendance processing.

Multimodal Toxic Speech Detection — Python, PyTorch, Hugging Face [GitHub] **2026**

- Developed an **AI/ML-based multimodal system** to detect toxic, abusive, and offensive speech in **Hindi-English (code-mixed) video content** by jointly analyzing text, speech, and visual modalities.
- Integrated **IndicBERT, Wav2Vec 2.0, VGG16, Whisper, OpenCV, FFmpeg, Librosa, and Hugging Face Transformers** for speech transcription, multilingual text understanding, audio feature extraction, video/frame processing, and visual feature analysis.
- Implemented **late-fusion techniques** to combine multimodal features and evaluated classification performance using **Accuracy, Precision, Recall, and F1-Score**, focusing on robustness for real-world content moderation.

Certifications

- **Google Cloud Generative AI** – Vertex AI Prompt Design, Gemini API, Responsible AI, BigQuery for Machine Learning.
- **Kaggle Learn** – Python, Pandas, Machine Learning, Data Visualization.
- **Deloitte Job Simulations** – Data Analytics and Technology.
- **Salesforce Certified Administrator** *(View Credential)*

Research & Recognition

- **Toxic Speech Classification Using Deep Learning and Machine Learning: A Survey** [Publication Link]
- **Media Recognition:** Research/project work featured in **Dainik Bhaskar (DB Star)** for developing deep-learning software for detecting abusive language and harmful behavior in video content.
